

**Reference letter for WEBCON Sp. z o.o.**

concerns the implementation of WEBCON Business Process Suite based on Microsoft  
SharePoint 2010

We are one of the biggest international clinic networks, performing clinical trials. Polish branch of the company has been operating since 2003 and specializes in performance of diagnostic and preventive programs, with a particular focus on osteoporosis, diabetes, rheumatic and neurological diseases.

Due to a systematic development and territorial dispersion of our institutions, we decided to implement a system capable of accelerating and optimizing business processes. Our priority was to enhance invoice registration and approval workflow. In order to do that we chose WEBCON Business Process Suite, based on its flexibility which allows to optimize wide variety of other processes in the future. We also valued user-friendly interface of the system as well as experience of WEBCON experts proven with reference letters.

Implementation began in August, 2013 and took only a month. That time was sufficient enough to handle invoice processing with several points of document registration and diverse scenarios of approval. In order to raise effectiveness of invoice transfer and archiving, we decided to use barcode module.

The system fully met our business expectations and significantly enhanced speed and quality of invoice processing in our company. WEBCON expert's also helped us with its additional optimization. At the moment we are considering automation of another workflows with WEBCON BPS and integrating it with other IT systems in our company.

We strongly recommend WEBCON Business Process Suite as an effective tool that increases operational efficiency of organization. We also recommend experts of WEBCON because of their professionalism, promptitude and experience in implementation of Document Management Systems.
